

What We Don't Know, Hurts Us

Dear George;

We had a great conversation about our world's hidden reality. And we talked about its diabolical effect on us.

We spoke about CoIntelPro, Mind Control (MK-Ultra), lab-created AIDS, the Church Committee, NSA/GCHQ surveillance on us, the documentaries, "1971," & "CitizenFour," etc. I LOVE having these discussions with people. I enjoy them immensely. But I rarely get a chance to express myself in regards to these very important issues.

Most people look at me as if I'm speaking Esperanto. Now, there's a language! More people speak Klingon than Esperanto! Am I right?! Also, we talked about Justin Bieber and whatever new star's public shenanigans. Because, of course, it's vital to our collective minds that we know about him & the stars! But I have to admit that I'm not immune from Mainstream Media's wriggling memes.

I recently succumbed to utter brain candy. I was at the library and it was just sitting on the table, and...and so I read it; the National Enquirer. Yes, the National Enquirer. That gossip-y, rumour-mongering rag. If it was a person, they could be exciting at times but, as soon as they talked about YOUR life, you'd hate 'em! In fact, if all they ever talked about was just mind-numbing tripe, you'd soon grow tired of them.

I've assembled some information for you. This info pack was made for you. The other info packs I've included were made for other people but I hope you'll find them edifying and helpful.

I'm hopeful. I figure if more & more people understand WHY the world is the way it is AND realize it, AND know they have the intelligence, heart and fortitude to change them, then, Goddamnit, we can change it! We can! No Obama advertising here. We can think. We can learn. We can love. We can question. We will evolve. We ARE evolving.

And that ain't brain candy!

^ How Opium is Keeping US in Afghanistan: CIA's Shady History of Drug Trafficking [January 3, 2014](#)

<http://mediaroots.org/opium-what-afghanistan-is-really-about/comment-page-1/#comments>

(NOTE: I've included the entire article below & added relevant notes at the end.)

Even though present-day Afghanistan flies under the news radar, it remains to be the longest military quagmire in US history. Aside from troops still occupying the country, thousands of private contractors are on the ground that the Pentagon [can't even account for \(1\)](#). Considering how Obama's foreign policy strategy has been to replace ground troops with drone strikes, the administration's logic behind continuing the occupation remains unclear.

War has always been about resources and control. Alongside the supposed surprise discovery of Afghanistan's [\\$1 trillion wealth of untapped minerals \(2\)](#), the Taliban had successfully eradicated the opium crop in the **Golden Crescent** before the US invasion. Now, more than [90% of the world's heroin \(3\)](#) comes from the war torn country.

As reported by [Global Research \(4\)](#):

"Immediately following the October 2001 invasion, opium markets were restored...By early 2002, the opium price (in dollars/kg) was almost 10 times higher than in 2000. In 2001, under the Taliban opiate production stood at 185 tons, increasing to 3400 tons in 2002 under the US sponsored puppet regime of President Hamid Karzai."

After more than twelve years of military occupation, Afghanistan's opium trade isn't just sustaining, it's thriving more than ever before. According to a recent report from the UN [Office on Drugs and Crime \(5\)](#), 2013 saw opium production surge to record highs:

"The harvest this May resulted in 5,500 metric tons of opium, 49 percent higher than last year and more than the combined output of the rest of the world."

Wow, that's a lot of opium – and a lot of money being made. So, who is reaping the spoils?

Many people outright dismiss the notion of the CIA overseeing the trade of illegal drugs as crazy talk. However, history shows that it's crazy not to entertain such a notion, especially during times of war profiteering.

In 2012, a Mexican government official from Juarez [told Al Jazeera \(6\)](#) that the CIA and other international security forces "don't fight drug traffickers" and that instead, the agency tries to "manage the drug trade."

Back in the fifties, the CIA turned a blind eye to drug trafficking through the **Golden Triangle while training Taiwanese troops against Communist China**. As William Blum reports in *Rogue State*:

"The CIA flew the drugs all over Southeast Asia, to sites where the opium was processed into heroin, and to trans-shipment points on the route to Western customers."

These are far from isolated incidents. During the eighties, the CIA financially and logistically backed anti-communist contras in Nicaragua who also happened to be international drug traffickers.

Former Representative [Ron Paul elaborated \(7\)](#) on the CIA's notorious corruption when speaking to a group of students about Iran-Contra:

"[Drug trafficking] is a gold mine for people who want to raise money in the underground government in order to finance projects that they can't get legitimately. It is very clear that the CIA has been very much involved with drug dealings. We saw [Iran-Contra] on television. They were hauling down weapons and drugs back."

Surprisingly, mainstream publications still regard the Iran-Contra CIA drug trafficking scandal as a 'conspiracy theory.' I explain why it's not on *Breaking the Set*:

Abby Martin calls out an article from New York Magazine that suggests the CIA's connection to cocaine trafficking is a mere conspiracy theory; recalling the CIA's support for Nicaraguan rebel fighters during the Iran Contra scandal with ties to US cocaine trafficking. 64 Comments

Circumstantial evidence aside, there is no conclusive proof that the CIA is physically running opium out of Afghanistan. However, it's hard to believe that a region under full US military occupation – with guard posts and surveillance drones monitoring the mountains of Tora Bora – aren't able to track supply routes of opium exported from the country's various poppy farms (you know, the ones the [US military are guarding](#)) (8).

In today's globalized world of rule-for-profit, one can't discount the role that multinational corporations play in US foreign policy decisions either. Not only have oil companies and private military contractors made a killing off the occupation, big pharmaceutical companies, which collectively lobby over [250 million dollars](#) (9) annually to Congress, need opium latex to manufacture drugs for this pill happy nation. As far as the political elite funneling the tainted funds, the recent [HSBC bank scandal](#) (10) exposed how trillions of dollars in black market sales are brazenly being laundered offshore.

Multinational corporations are in it for the long haul, despite how low public support is for the war. A little mentioned [strategic pact](#) (11) has already been signed that **will allow a US troop presence to remain in Afghanistan until 2024**.

The US' goal of sustained warfare to oversee the world's opium trade has been alleged by many, including foreign military officials. In 2009, a former commander in the Russian invasion of Afghanistan, [General Mahmut Gareev](#) (12), said to RT:

"Americans themselves admit that drugs are often transported out of Afghanistan on American planes. Drug trafficking in Afghanistan brings them about 50 billion dollars a year – which fully covers the expenses tied to keeping their troops there... [the US military doesn't] have any planned military action to eliminate the [Taliban]."

The unwinnable nature of the war becomes more apparent when learning that the **US government was paying Taliban insurgents** to [protect supply routes](#) (13) and "[switch sides](#) (14)" in an attempt to neutralize the insurgency. The logic of funding both sides of the war to "win" is too incomprehensible a concept to grasp. Clearly, this war is meant to be sustained.

Baseless rhetoric aside, here's the hard, hypocritical truth: this government is fighting a multi-billion dollar '**War on Drugs**' worldwide, resulting in thousands of deaths every year and millions of nonviolent drug users rotting away in prison. Yet, the US is at the very least protecting the largest source of the deadliest and most addictive drug on the planet. If not for the obvious, then why?

WhoWhatWhy Introduction by Milicent Cranor:

The story below offers a rare close-up view of a man who is so creepy it's fascinating. He actually performed some of the dirty, unthinkable deeds you read about in the various

exposés on the CIA.

According to the author, the man “looks like Danny DeVito playing the Penguin, and talks like Edward G. Robinson as gangster Johnny Rocco in Key Largo.”

The Penguin in question is Ira “Ike” Feldman. And the deeds he performed were for MK-ULTRA, the CIA’s program on mind control. They experimented on unsuspecting people, slipping them LSD without their consent, sometimes with devastating results. The project’s architect, Sidney Gottlieb, [described in a 1953 memo](#) the ways in which the drug could be used:

“Disturbance of memory; discrediting by aberrant behaviour; alteration of sex patterns; eliciting of information; suggestibility; creation of dependence.”

From all that has been written about the CIA, we find it easy to believe just about everything Feldman says on the subject. But the real value of this story is not so much the information it imparts; it’s the character it reveals about a major player — even if we see him only from the outside. Here, you can witness the way he talks, the attitude he exhibits, the contradictions he ignores, and the self-justifications he declares.

*SORRY ABOUT THE POOR QUALITY Project MKUltra, or MK-Ultra, was a covert, illegal human research program into behavioral modification run by the **Central Intelligence Agency's (CIA) Office of Scientific Intelligence**. The program began in the early 1950s. The research was undertaken at 80 institutions, including 44 colleges and universities, as well as hospitals, prisons and pharmaceutical companies. The CIA would operate through these institutions using front organizations, although sometimes top officials at these institutions would be aware of the CIA's involvement. MKUltra was allocated 6 percent of total CIA funds. Project MKUltra was first brought to wide public attention in 1975 by the U.S. Congress, through investigations by the **Church Committee**, and by a presidential commission known as the **Rockefeller Commission**. Forty years later, the story still seems hard to credit: In the summer of 1977, Capitol Hill was gripped by revelations of the [CIA's top-secret MK-Ultra mind control research program, targeting unsuspecting American citizens, in some cases by luring them to brothels to be fed LSD-laced cocktails.](#)

The blockbuster hearings that summer, chaired by [Sen. Edward M. Kennedy](#), Massachusetts Democrat, and aided by a timely dump of intelligence documents, touched some of the country's rawest nerves: the assassination of [Kennedy's](#) brothers, the possibility of mind-controlled "**Manchurian candidates**" and the increasing prominence of LSD and other hallucinogenic drugs across Western culture.

Although the [CIA](#) program officially ran from 1953 to 1964, its dark and fertile legacy stretches to today, living on in modern conspiracy theories about U.S. intelligence agencies' ability and willingness to manipulate society through surveillance, disinformation, celebrity culture and strategic news leaks.

Security advocates argue that domestic intelligence-gathering is vital for the sake of homeland security. Critics counter that revelations that the [CIA](#) and **the National Security Agency** can hack into phones, computers and even televisions connected to the internet show their powers are still too great and threaten essential personal liberties and constitutional protections.

The 1977 MK-Ultra hearings first tilted similar suspicions and were considered a critical pivot in official and popular attitudes toward the nation's intelligence community. Triggered in part by the shock of the Watergate scandal, they also revealed the [U.S.](#)

[government](#)'s covert assassination programs and surveillance of American citizens brought to light by the [Church Committee](#)'s 1975 investigations of the [FBI](#), [CIA](#) and NSA.

The August 1977 MK-Ultra hearings specifically explored what seemed like an outlandish idea straight out of science fiction: the possibility of government mind control.

[Kennedy](#), whose reputation had been severely tainted by the Chappaquiddick scandal, also had a complex relationship with the [CIA](#), given what the agency knew about the assassinations of his brothers Robert and John in the 1960s. To begin the inquiry, [Kennedy](#) told Stansfield Turner, President Carter's pick to head the [CIA](#) in the wake of the [Church Committee](#) revelations, that he "hoped the hearings would close the book on this chapter of the [CIA](#)'s life."

Brainwashed: The Secret CIA Experiments in Canada: Patients at a psychiatric hospital in Montreal were subjected to intensive shock treatments, LSD and drug-induced comas in the 1950s and 1960s. The brutal experiments were funded by the Canadian government and the U.S. Central Intelligence Agency. The Fifth Estate began investigating the story in 1980 and followed the victims who successfully sued the CIA. Now, as result of our reporting, more and more victims and their families are coming forward. Less talked about today are programs like the military's surveillance of domestic protest groups, **maintaining files on at least 100,000 Americans ranging from Jesse Jackson to Joan Baez and Arlo**

Guthrie, or the FBI's "Custodial Detention List," a list kept by the FBI of foreigners and citizens to be immediately detained in case war broke out.

Today, if you go on Twitter, you can find the NSA tweeting about its [commitment to recycling](#), or the CIA [joking](#) about still not knowing the whereabouts of Tupac. Why are these once-sinister and little-known spy agencies so eager to put on a friendly face for us? The answer can be traced back to the **Church Committee of 1975-76**, which forever changed the way Americans looked at the intelligence agencies meant to serve them.

Last week marked 40 years since the final report of the Church Committee was released to the public. You can read its report [here](#) (1). Set up in January 1975 in the wake of Watergate, and shortly after investigative reporter Seymour Hersh revealed the CIA's role in not only undermining foreign governments but in spying on U.S. citizens, the Committee spent 16 months trawling through classified and unclassified documents and grilling hundreds of counterintelligence officers, CIA directors, FBI higher-ups and other officials in order to shine a light on the scope of the intelligence community's abuses over the previous decades.

10: Beneficial Brainwashing

Dr. Ewen Cameron believed he had come up with a cure for schizophrenia. His theory was that the brain could be reprogrammed to think in healthy ways by forcibly imposing new thought patterns on it. His method was to make patients wear headphones and listen to audio messages looped over and over, sometimes for days or even weeks at a time. He called this method "psychic driving," because the messages were being driven into the psyche. The press hailed it as "beneficial brainwashing."

During the 1950s and early 1960s, hundreds of Cameron's patients at **Montreal's Allan Memorial Clinic** became his unwitting test subjects - whether or not they actually had schizophrenia. Some patients checked in complaining of problems as minor as menopause-related anxiety, only to find themselves sedated with barbiturates, strapped into a bed, and forced to listen for days on end to messages such as "You like you and need you. You have confidence in yourself."

One time, to test the technique, Cameron placed patients into a drugged sleep and made them listen to the message, "When you see a piece of paper, you want to pick it up." Later he drove them to a local gymnasium. There, lying in the middle of the gym floor, was a single piece of paper. He happily reported that many of them spontaneously walked over to pick it up.

When the CIA learned of what Cameron was doing, it became interested and started surreptitiously channeling him money. But eventually the agency concluded that Cameron's technique was a failure and cut his funding, prompting Cameron himself to admit that his experiments had been "a ten year trip down the wrong road." In the late 1970s a group of Cameron's former patients filed suit against the CIA for its support of his work and reached an out-of-court settlement for an undisclosed amount of money.

How does a government funded news organization expose its funder? - - - The CBC is always pushing an agenda, never facts.

[\[-\]SpenseRoger\[S\]](#) 3 points 4 days ago Yea, I meant to expand on that further other than just hinting at with saying it's still being covered up in title.

You raise a valid question and you could answer it in a few ways:

- -Under the theory of cover-up/disinformation it's said they always mix in some truth to make it more believable.
- -CBC is funded by the Canadian people which is facilitated through the Canadian government. CBC is given guaranteed funding for a given period in the federal budget and ran independently from any ministers.
- -The separation of powers.
- -A parliamentary government with regular elections. People in the CBC have no idea which party will become majority.
- -Editors, writers, journalists & correspondents are given editorial freedom.
- -The CBC is exposing a program that was authorized by a government that hasn't been in power since the 1960's. So if you don't disregard linear time then they are not exposing the same government or their "funders."
- -Whistle blower protection laws and source protection laws.
- -Freedom of information act.

Look all I'm saying is it's not impossible for them to expose the government. It might not be likely, but it's possible.

CBC is known for having quite the liberal bias as of late (as so nearly all media, except labeled non-liberal media). However they have a history of some great pieces. Have you seen their one on JFK from the 1970s? It's pretty much an anthem for Oswald didn't do it.

And unlike corporate news in the U.S with their highest over-riding un-written rule of: Never criticize the corporations, the CBC does routine, vicious, and highly effective investigative journalism exposing corporations in Canada and the U.S

And unlike U.S media, they still do lots of under-cover journalism to protect citizens and consumers.

It's not perfect, and it would seem like they have some perverse incentives being "funded by the evil government" but really the incentive actually comes from the citizenry... If we didn't find watch and read them and if the 4 Billion a year it costs to run it stopped being worth it...The citizenry would petition their representative to defund it and people in the CBC would be out of a job!

[\[-\]deplorablehuddy](#) 1 point 4 days ago Very thorough reply. I'm not sure I agree with everything you say - maybe you work there.

Re: they have no idea who will be in government. Ok true, who does. But what they do on a constant basis (and it has driven me to stop taking them seriously) is push a specific political agenda, assuming their listeners agree with them. It drives me mental. I pay for this trash.

E.g. at any level of broadcast (city, national) - push negative stories of republicans as if democrats in the US are saviours.

E.g. Push stories about transsexuals and their "rights" (like we don't already have a charter of rights and freedoms) and especially pushing this theme in elementary schools. It's frightening.

I could go on and on but the theme is the same: this "news" organization is no longer about news but about a country-wide propaganda machine driven by a select group of people ... probably top level bureaucrats.

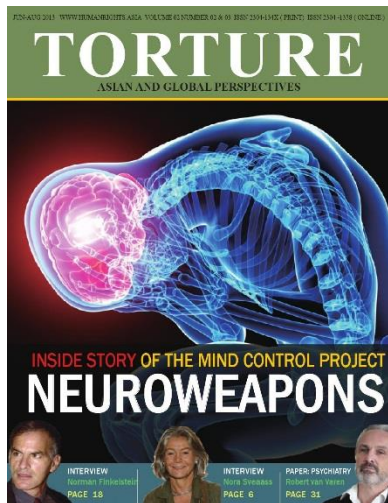

^ Misled and Betrayed: How US Cover Stories Are Keeping a Cold War Weapon and Illegal Human Testing Secret

A thank you to Jo Easton for her time and advice with respect to the final draft of this paper.

Terms and definitions: For this paper, the term **electromagnetic radiation (EMR)** is used interchangeably with frequencies, **radio-frequency (RF)**, radio signals, radio waves, microwaves, microwave signals, low- frequency, **extremely low frequency (ELF)**, ELF frequencies, EM fields, beam weapons, **directed energy weapons**.

1. Introduction

The US atomic bomb exploded and the world discovered the existence of a formidable secret weapon. By contrast, this paper will illustrate that there is proof that neuroweapons (mind control weapons developed during the Cold War) are another formidable weapon. However, their power lies partly in keeping them secret so they can be used surreptitiously. In principle, the science is possible to target and influence a person remotely and governments have been conducting secret research to develop neuroweapons. Based largely on the science of electromagnetic radiation (EMR), such weapons could be used to stop a person or many people by influencing their behaviors by manipulating various physical and psychological parameters related to brain functions; this could change how wars are fought. Shrouded in secrecy, few people have even heard of neuroweapons. Nevertheless, their importance has often been compared to the atomic bomb¹ and a brief summary of the significant amount of obscure information is presented below.

The consensus is that neuroweapons are still science fiction and any allegations of unlawful human subject experiments involving neuroweapons are just elaborate conspiracy theories. This paper will argue that the consensus is wrong; showing that secret CIA mind control research began as far back as the 1950s with the science of physical and psychological torture being investigated in the US in response to fears that Russia and China had developed new, similar techniques. Professor Alfred McCoy, an

expert on US no touch torture, described the CIA research as “a massive mind-control effort, with psychological warfare and secret research into human consciousness that reached a cost of a billion dollars annually, a veritable Manhattan Project of the mind.”² In the mid-1970s, some CIA mind control programs, including non-consensual human subject experiments with LSD and other drugs, were exposed in congressional hearings while other programs remain classified.³

This paper will present emerging evidence supporting the argument that the consensus is based on misleading US government cover stories which have been presented as official explanations while actually concealing secret programs and activities.⁴ Steven Aftergood, a highly regarded secrecy expert described the US Cold War secrecy system as a “poisonous legacy”: the excessive use of government cover stories was routine and secrecy manuals authorized active deception in order to promote believable cover stories.⁵ This paper will present converging facts that strongly suggest two major cover stories concealed the existence of neuroweapons and illegal human testing, fooling nearly everyone for sixty years and counting. These cover stories should now be seen as obsolete with the evidence beginning to reveal that neuroweapons are likely to have already been developed. As mentioned above, the first cover story is that secret neuroweapons are still science fiction. The second cover story concerns the official US policy on EMR bioeffects; it being that there are no proven effects of EMR other than heating.⁶ For example, most people know how a microwave oven works; the microwaves produce a thermal effect and heat or cook food as in a microwave oven.

Reactive, not proactive NYPD employees, transport Maksim Gelman

If you pay for a good or service, don't you expect some benefit in return?

If you walked into a McDonald's, ordered a burger, saw it rang-up on the register, and gave them your money, you'd expect within a minute or two to have a burger, right? If five-minutes went by you might point-out to an employee that your order had yet to be filled, right? If a longer-than-average time went by you may even be comped some extra food as a way to lessen any ill-will that may have developed from the lackluster service.

Such deliverables – the supply of a good or service paid for, or even adequate customer service, are entirely void from policing as it's currently structured.

Not only are police “customers” told to pay “or else” (talk about perverse incentives), but courts (proving just who they serve) have ruled that police employees have no obligation to provide you, as an individual, any good or service.

But aren't police here to protect us!?

Not so much. A situation in NYC, in which a non-badge wearing man subdued a knife-wielding killer, while badge-wearing individuals looked on, underscores this fact.

From the article [City Argues NYPD Had No “Special Duty” To Protect Subway Hero From Madman’s Rampage](#), reposted below in its entirety:

“When the news was brought to my attention that police had an opportunity to intervene and maybe prevent the whole incident, and it was explained to me they chose to stay in the motorman’s compartment instead of coming out, I was very upset.”

Summary: *The Islamophobia Industry* is a disturbing account of the rising tide of Islamophobia sweeping through the United States and Europe. Nathan Lean takes us through a world of conservative bloggers, right-wing talk show hosts, evangelical religious leaders and politicians, all united in their quest to

exhume the ghosts of 9/11 and convince their compatriots that Islam is the enemy. Lean uncovers their scare tactics, reveals their motives and exposes the ideologies that drive their propaganda machine. Situating Islamophobia within a long history of national and international phobias, The *Islamophobia Industry* challenges the narrative of fear that has for too long dominated discussions about Muslims and Islam.

Using the most potent pieces of evidence available, the author forms a cohesive narrative demonstrating that the Israeli Mossad, with the assistance of Zionist assets in the American government, conspired to execute the 9/11 attacks as a false-flag event designed to initiate the devilish neocon dream of a "Clash of Civilizations" between the Western world and the Islamic world, for the benefit of Israel and Zionism.

Foreword

The following essay represents, in my opinion, the accurate and detailed plan of the present Zionist regime (of Sharon and Eitan) for the Middle East which is based on the division of the whole area into *small* states, and the dissolution of *all* the existing Arab states. I will comment on the military aspect of this plan in a concluding note. Here I want to draw the attention of the readers to several important points:

1. The idea that *all* the Arab states should be broken down, by Israel, into small units, occurs again and again in Israeli strategic thinking. For example, Ze'ev Schiff, the military correspondent of *Ha'aretz* (and probably the most knowledgeable in Israel, on this topic) writes about the "best" that can happen for Israeli interests in Iraq: "The dissolution of Iraq into a Shi'ite state, a Sunni state and the separation of the Kurdish part" (*Ha'aretz* 6/2/1982). Actually, this aspect of the plan is very old.
2. The strong connection with Neo-Conservative thought in the USA is very prominent, especially in the author's notes. *But*, while lip service is paid to the idea of the "defense of the West" from Soviet power, the real aim of the author, and of the present Israeli establishment is clear: To make an Imperial Israel into a world power. In other words, the aim of Sharon is to deceive the Americans after he has deceived all the rest.

When their leaders cannot be relied upon, people believe what they are led to believe. Truth and knowledge become perverted by political expediency, by the needs of the day.

How does one persuade trusting citizens that an emperor is naked? In the fairy story, it takes the naïve candour of the little boy who is too young to realise the consequences of speaking out of turn. But once he does speak, the rest of the people look up and see that what he says is true, that their ruler is behaving with an imperial disregard for both truth and decency.

Let us see if that works in the real world, too.

Gentlemen and ladies, people of the town. I wish to make an announcement.

AIDS is a man-made disease.

It is now all but certain that it was human hands (and, in particular, those of the doctor and the scientist) that started the AIDS pandemic, which now represents the worst outbreak of infectious disease the world has ever seen.

27 million deaths. More than 66 million infected with HIV since the pandemic began. No wonder everyone insists that the emperor is draped in finery.

The study initially involved 600 black men – 399 with syphilis, 201 who did not have the disease. The study was conducted without the benefit of patients’ informed consent. Researchers told the men they were being treated for “**bad blood**,” a local term used to describe several ailments, including syphilis, anemia, and fatigue. In truth, they did not receive the proper treatment needed to cure their illness. In exchange for taking part in the study, the men received free medical exams, free meals, and burial insurance. A mockup of the "Fat Man" nuclear device.

In 1995, President Bill Clinton formally apologized on behalf of the U.S. for the government-funded radiation experiments conducted on humans for decades after World War II. The [investigative reporting of Eileen Welsome](#) of the Albuquerque Tribune led to the [Openness Initiative](#), an effort to examine the ethics of over 4,000 experiments kept on record by several U.S. government departments, including the Department of Defense and [NASA](#).

Ruth Faden of Johns Hopkins Berman Institute of Bioethics chaired the committee investigating these experiments, and summed up the human rights abuses in a [1995 televised announcement](#):

"We have found that wrongs were indeed committed. Both with experiments involving radiation, and with the intentional releases of radiation into the environment...Patients were used as subjects of experiments without their knowledge or consent. Information was withheld from affected communities, and from the public. Secrets were kept, to protect the government from embarrassment and legal liability."

In the experiments, scientists exposed subjects to uranium, plutonium, americium, and other radioactive substances to determine what they did to the human body. These experiments were justified by arguing that it was in the national interest to know how much radiation a body could stand because of the imminent nuclear threat the Cold War posed. But that doesn't excuse the way these experiments were conducted, which was shady as hell: Many of them included exposing [predominantly poor and black](#) cancer patients to high radiation levels while telling them they were receiving "treatment." In another experiment, [car accident victims](#) were injected with plutonium.

^ Inventing the AIDS Virus By Peter H. Duesberg (1996)

“Don’t be scared by the size of the book. It is well written, accessible, and engaging. The science is patiently explained for the general reader without being patronizing or condescending. This is coming from someone who has a paralyzing fear of scientific writing. I read the first hundred pages the day I got it. Plus, the last 300 pages are appendices which ought, in any case, to add credibility to the argument, since they present the actual evidence upon which the argument is based.” – ([Steve McLeod](#)).

READ: With annual federal funding at more than \$7 billion, AIDS research is better funded than any other disease – including cancer. Yet it has also produced the least results. Why? Duesberg explains how the lure of money and prestige, combined with powerful political pressures, have tempted otherwise responsible scientists to overlook – even suppress – major flaws in current AIDS theory ([duesberg.com](#)).

^ Unequal Protection: The Risk of Corporate Dominance and the Theft of Human Rights By Thom Hartmann (2002)

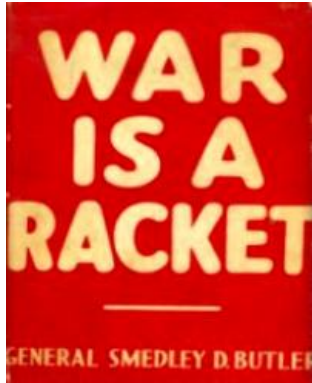

“The book describes the accidents and collusions of history that have resulted in the establishment of “personhood” for corporations, so they might enjoy the Constitutional protections intended for individuals, while wielding the power of great wealth and almost unlimited resources.” – ([Wilson M. Powell](#)).

READ: “If you wonder why the corporate world constantly lurches from malaise to oppression to governmental corruption and back, *Unequal Protection* reveals the untold story. Beneath the success and rise of American enterprise is an untold history that is antithetical to every value Americans hold dear. This is a seminal work, a godsend really, a clear message to every citizen about the need to reform our country, laws, and companies.” – Paul Hawken, author, *Natural Capitalism* ([thomhartmann.com](#))

^ War Is a Racket –

by General Smedley Butler (1935)

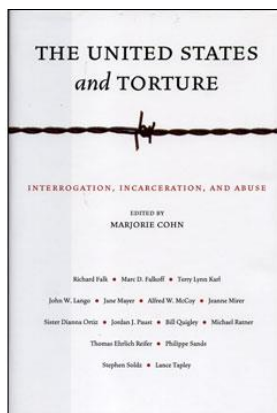

“War is a racket. It always has been. It is possibly the oldest, easily the most profitable, surely the most vicious. It is the only one in which the profits are reckoned in dollars and the losses in lives. In the World War [World War I] a mere handful garnered the profits of the conflict. At least 21,000 new millionaires and billionaires were made in the United States during the World War. That many admitted huge gains in their income tax returns. How many other war millionaires falsified their tax returns no one knows? [Please note these are 1935 U.S. dollars. To adjust for inflation, multiply all figures X 10 or more]” – (wanttoknow.info).

READ: Smedley Darlington Butler (July 30, 1881 – June 21, 1940), nicknamed “The Fighting Quaker” and “Old Gimlet Eye”, was a Major General in the U.S. Marine Corps, and at the time of his death the most decorated Marine in U.S. history. During his 34-year career as a Marine, he participated in military actions in the Philippines, China, in Central America and the Caribbean during the Banana Wars, and France in World War I. By the end of his career he had received 16 medals, five of which were for heroism. He is one of 19 people to twice receive the Medal of Honor, one of three to be awarded both the Marine Corps Brevet Medal and the Medal of Honor, and the only person to be awarded the Brevet Medal and two Medals of Honor, all for separate actions ([Smedley Butler](#)).

^ The United States and Torture: Interrogation, Incarceration, and Abuse

Edited By Marjorie Cohn (2011)

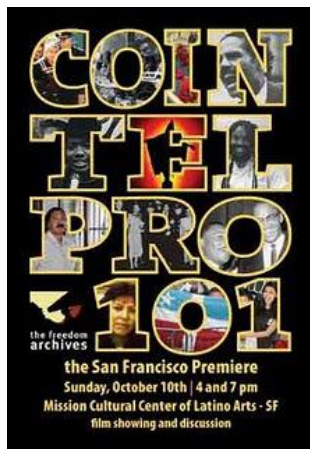

“A magnificent, though deeply disturbing collection of essays on torture, considering its history, its use since September 11, and the obstacles to holding those responsible accountable. This is the best collection of essays on the topic and it leaves no doubt that the nation has not yet come to grips with the inhumanity perpetrated under the guise of national security.” – ([Erwin Chemerinsky](#)).

READ: *Waterboarding. Sleep deprivation. Sensory manipulation. Stress positions.* Over the last several years, these and other methods of torture have become garden variety words for practically anyone who reads

about current events in a newspaper or blog. We know exactly what they are, how to administer them, and, disturbingly, that they were secretly authorized by the Bush Administration in its efforts to extract information from people detained in its war on terror. What we lack, however, is a larger lens through which to view America's policy of torture — one that dissects America's long relationship with interrogation and torture, which roots back to the 1950s and has been applied, mostly in secret, to "enemies," ever since. How did America come to embrace this practice so fully, and how was it justified from a moral, legal, and psychological perspective? ([NYU Press](#)).

*"Cointelpro 101 exposes illegal surveillance, disruption, and outright murder committed by the US government in the 1950s, 60s, and 70s. Cointelpro refers to the official **FBI COUNTER INTELIGENCE PROgram** carried out to surveil, imprison, and eliminate leaders of social justice movements and to disrupt, divide, and destroy the movements as well. Many of the government's crimes are still unknown. Through interviews with activists who experienced these abuses first-hand, with rare*

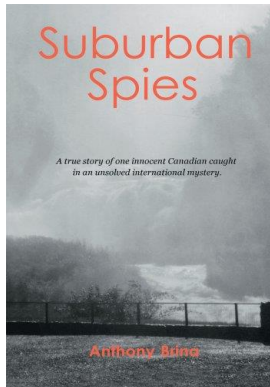

historical footage, the film provides an educational introduction to a period of intense repression and draws relevant lessons for the present and future." – [borders](#)

READ: The films brilliance is not simply its nicely-styled aesthetic elements. They are there of course. Strong interviews, rarely seen clips, high quality audio and video production across the board with equally strong narration from **Liz Derias**. But it is the films ability to force new confrontation with the political reality of today, as much as with the past, that truly demonstrates its value. **The simple point made by Geronimo Pratt is also its strongest; that COINTELPRO made official the illegality of politics, the criminalization of positions represented by its targets. COINTELPRO was the political and legal descendant of its ancestors, slavery and genocide, and is now itself an ancestor to the still-implemented policies of, for instance, the Patriot Act.** This central theme of the film is its most important because it forces us to put in context the current and horrific state of peace, freedom and labor movements. “Anthony Brina’s harassment dates from 1995, and continues to this day. I haven’t read the book from cover to cover, wishing to put my available time with strength to do productive things on other matters. However, I’ve read incidents throughout the text, and for me, this book is VERY well written, and most importantly, reports objective experiences of target Brina. No exaggerated claims, no blaming the harassment on groups for which the author has no proof are responsible. And he does relate instances where people he has contacted have acknowledged some familiarity with

the problem of organized harassment. As you can see from the table of contents, *Brina’s story shows that the harassment crime syndrome many targets call “**organized stalking and electronic harassment**” is a WORLD WIDE phenomenon*” – [Eleanor White](#)

READ: In Canada, Anthony speaks with authorities including Canadian Intelligence to see that the iniquity continues, and discovers a **Global Surveillance Network** which has been secret to the world. This true story is an account of Anthony Brina's incredible events since 1995, which include a threat on his life, a planted suicide note in his residence, and false accusations of a Police search for him. Who is behind this collusion of espionage activity? Is it family or friends, a government, or perhaps corporations are behind this international mystery? Can you determine who is behind it and why they have chosen Anthony as their victim? As you read his story you realize this could happen to you. [Suburban Spies. New Gang Stalking Book?](#)

What is the Milgram experiment?

Stanley Milgram, a psychologist at Yale University, conducted an experiment focusing on the conflict between obedience to authority and personal conscience. Many war-criminals claimed they were merely following orders and could not be held responsible for their actions, in the trials following the World War 2.

Were the Germans in fact evil and cold-hearted, or is this a group phenomenon which could happen to anyone, given the right conditions?

What did the Milgram experiment show about humans?

Conclusion - Obedience to Authority.

Before the Stanley Milgram Experiment, experts thought that about 1-3 % of the subjects would not stop giving shocks. They thought that you'd have to be pathological or a psychopath to do so.

Still, 65 % never stopped giving shocks. None stopped when the learner said he had heart-trouble. How could that be? We now believe that it has to do with our almost innate behavior that we should do as told, especially from authority persons.

^ Targeting America: The FBI, COINTELPRO, and Project Pedophile

In today's COINTEL Program, one of the FBI's favorite soft kill tactics is to label targeted individuals as pedophiles, rapists, sexual deviants or "mentally unstable" in order to isolate and destroy them By [XKeyscore](#) - March 30, 2016

<https://www.intellihub.com/targeting-america-the-fbi-cointelpro-and-project-pedophile/>

(NOTE: I've included the entire article below.)

([INTELLIHUB](#)) — COINTELPRO or "Counter-Intelligence Program," was an illegal operation run by the FBI against American citizens in the 1960's and 1970's. It was revealed by the Church Committee in the 1970's and the FBI was ordered to shelve the program.

In actuality, the **FBI** re-named the program, gave it additional veneers of security classification(s), and it still continues today, albeit with the assistance of advanced technology and the cooperation of the **NSA** and **DHS**.

The goal of today's **COINTELPRO** is in part based on what are referred to as the 5 D's by the United Kingdom's **General Communications Headquarters (GCHQ)**. The 5 D's are Deny, Deceive, Disrupt, Degrade, and inevitably Destroy the target.

Well who are the targets one might logically ask next?

If one looks at potential threats through the eyes of the federal government, they will soon discover that NRA members, returning veterans, activists, whistle-blowers, watchdog bloggers, and investigative journalists are lumped in with the likes of al Qaeda and ISIS operatives. In many cases these "**domestic threats**" are considered to be more of a risk than actual terrorists.

Why one may ask?

Well, because there are tens of thousands more innocent Americans than there are real terrorists, it keeps federal budgets plump and fluffy, whilst simultaneously allowing for asset seizure under (false) premises. Additionally, it appears as though Americans with a strong moral compass are a threat to the status quo, to the corrupt power structure.

So what is one of the FBI's primary operational tools to Deny, Deceive, Disrupt, Degrade, and inevitably Destroy the targeted individual?

What I refer to as ***“Project Pedophile.”***

The FBI, patterning their operations in part after the **East German Stasi’s Zersetzung operations** and **GCHQ’s 5D** strategy spend hundreds of millions of dollars going after soft targets – innocent Americans, who were never involved in any criminal activity. The FBI uses a **5D/Zersetzung** combinatory strategy in order to isolate, potentially radicalize and/or destroy the targeted individual.

In street parlance this is referred to as ***“Gang Stalking”*** since civilian hirees are often utilized for this sadistic and cruel work.

What better way to isolate an individual than accuse him or her of violent crimes of moral turpitude against helpless people – such as children. **The FBI’s favorite 5D/Zersetzung Soft Kill tactic is to label the targeted individual as a pedophile, rapist or sexual deviant to his or her friends, family, colleagues and co-workers.**

That is all that is necessary. Let’s face it. If someone from law enforcement (whom we should be able to trust) approached you or I with a bona fide charge that one of our friends or family members was a pedophile, how would we react? I know that I would avoid the individual at all costs. That serves to immediately isolate the targeted individual.

The FBI and DHS have two sets of records (at least). They maintain an internal grouping of records with the individuals’ actual personal and biographical information, medical history, financial and academic records, etc. These are reviewed by the FBI’s in-house psychologists and are utilized as part of their **Psychological Operations (PSYOPS)** targeting protocol. The “higher” level the target, the more individuals, man-hours, harassment and isolation they are set up for.

But then the FBI also have the false records with fabricated criminal backgrounds which they have so diligently worked to create for the targets of their 5D/Zersetzung operations – a.k.a. COINTEL Program.

The bogus records and false information are relayed to state, county and local law enforcement agencies, in addition to foreign governments, should the targeted individual travel. The FBI will also infuse the bogus criminal records with factual data-bites from the individuals’ personal history in order to “build” a more “convincing” and “realistic” case against their targets.

Examples: *“Tommy Target was an altar boy at a church where a priest once molested children four decades ago, even though Tommy Target was never a victim himself.”*

This translates to ***“Tommy Target was a victim of pedophilia at a very young age, hates children and is now engaged in crimes of moral turpitude with children.”***

“Susie Subversive, a passive Greenpeace activist volunteers at an animal shelter on weekends and wants to become a veterinarian.” This translates to *“Susie Subversive has an unnatural attraction to large canines, is involved in bestiality and trolls websites depicting abnormal human-animal interactions in her spare time.”*

I refer to this as ***“creating the narrative.”*** The disinformation created by the FBI and fed to the targeted individuals’ contacts is tailored to the information recipients, and in many cases is based on some factual aspects regarding the target’s actual lifestyle in order to make the false background more believable. “Tommy Target” was an altar boy at a church where a priest was defrocked for inappropriate activity with young males and “Susie Subversive” does indeed spend a lot of time with animals.

If the target’s neighbors have young boys, then the neighbors are told that the target likes male toddlers. If the target’s landlord is a seventy-something year-old widower, then the target is labelled as a sexual deviant who has an unhealthy interest in senior citizens.

Like disinformation will also be relayed to all of the commercial locations the target frequents in order to compel his/her contacts at those locations to ***“cooperate with the authorities in keeping the community safe.”***

But what about witnesses and testimony? The FBI will access court records and speak to family members under the guise of an ***“official investigation.”*** Your ex-wife wasn’t happy with her divorce settlement, or maybe your ex-partner has an axe to grind over a failed business two decades ago. The FBI doesn’t care. Those people are approached, coerced, cajoled and compensated in order to give ***“evidence”*** and ***“testimony”*** which lends credence to, and neatly collaborates with the false narrative the FBI has created for the targeted individual.

Ready for the kicker? This fabricated criminal background is what gets passed around to non-federal law enforcement agencies through regional data fusion centers, and to foreign governments if one travels. And yes, the FBI will also makes sure that the bogus information is also fused with your passport and travel records held by the Department of State.

Deny, Deceive, Disrupt, Degrade and Destroy. Ain’t that special.

Oh but the FBI is not done yet. They will create bogus social networking accounts, such as Facebook, in the targeted individual’s name, post his or her picture, link them to old friends and then friend him or her with young children or German Shepherds in the case of Susie Subversive. This occurs after the Facebook account has been directly linked to, and verified through the target’s email account – which they also hacked. In turn, the bogus social networking account(s) will be paraded to neighbors, family, colleagues and

at commercial locations the targeted individual frequents, by the FBI, DHS and their civilian entourage.

The **FBI's DITU (Data Interception Technology Unit)**, and the NSA may work together on these targeting and harassment protocols, especially since the **NSA's TAO (Tailored Access Operations)** has better ability to scoop up all of a targeted individual's communications than the FBI. **U.S. Cyber-command, based at Fort Meade** along with the NSA, may also be involved in this activity targeting innocent Americans

If one goes on-line and reads blog entries, watches YouTube videos or reviews past allegations against individuals who are considered politically outspoken, one of the most common threads in all of their stories are that they are either accused of pedophilia, child pornography or mental instability. The mental health accusations were a tactic used by Stalin in Soviet Russia, who institutionalized anyone he considered to be a threat.

The movie "*Kill the Messenger*," **(NOTE: This movie is on page 4.)** which describes how journalist **Gary Webb** became a targeted individual provides for a peek behind the curtain into the FBI's "Project Pedophile" operation. While another agency was involved in Webb's targeting, the FBI's 5d/Zersetzung combinatory strategy is accurately depicted in this movie.

I believe that there are decent **FBI, DHS and NSA** employees who really are focused on protecting the general population and who want no part of the FBI's extra-judicial COINTEL Program.

Many of these employees are not on a need-to-know basis, and secondly since these ops are so illegal and unconstitutional, they are compartmentalized. Thirdly, if any of those belonging to the honest cadre of federal employees were to step forward, they too would become targets themselves, and would be thrust into the media limelight while their respective agencies trumpeted buzzwords and catch-phrases such as "**pedophile, sexual deviant**" and of course "**mentally unstable.**"

I am always careful to emphasize that most state and local law enforcement personnel are decent people and deserve our respect. It is not their fault that the FBI, in conjunction with the NSA and DHS, are filling regional data fusion center databases and networks with terabytes of disinformation.

Look at it this way: the FBI is abusing its power and is engaged in outrageous government conduct and cruel and unusual punishment. ***They are jerking around local and state law enforcement, traumatizing the neighbors, landlords, family members, friends and colleagues of the targeted individuals, are methodically terrorizing innocent Americans, and bloating information systems vital to our national security***

with disinformation in order to meet their agenda, no matter how immoral and treasonous it might be.

(NOTE: This atrocious behaviour is global & is being done to Canadians, right now!)
